 babe wake up new error dropped
i upgraded broken javer 322 to javer 152 and replaced it with 251 bc its the last working version for xp
it would be funny if its the same error

You forgot to patch java... the error appears in sunmscapi.dll, a file that is from the list of files that REQUIRE older versions to work (take them from java 8v111)

Here you go:
It says:Quote:For it to properly work, it is necessary to replace sunmscapi.dll for the one included with Java 8u152, which you can grab from its portable edition
