Massgrave is a tool that allows you to activate windows 10, windows 11, windows 7 and windows8 with the click of a button

with it you can also activate windows 7 and 10 ESU

Its hosted on github and idk if itll stay up after windows 10 eol, since lots of people might use it

You can also change your version from windows 10 home to pro, or iot ltsc, which gives you support until 2032. which you can then also activate
