So me and 1 or 2 others are working on a site like youtube but how it was in 2005 or a bit after that.
So not up to todays standards \. No 4k, no polymer, no html5 and analytics

All fully xhtml and html4, and working on browsers of that era
The project is far from done, as a matter of fact its mostly just an idea for now
What we got so far is a very basic homepage with videos, a watch page with comments [no way to add them, as we don't have an account system yet].

If anyone has time to spare and wants to help us with this project, join our discord at
gg/QFGHu2snHY

Thanks!
